this basic instinct This theory may appropriately describe the reason for labor among animals... primarily to survive However, there is not much evidence that animals think beyond surviving in their own habitat But there is much more to human involvement in work than mere survival Why? Because a big part of why humans work, besides

Fluid jets occur in Earth's atmosphere and The Jet-Stream ...

This scaling theory links the planet's radius, its rotation rate, and the turbulent kinetic energy level of the fluid to the scale and spacing of its jets In accord with this theory, Earth's atmosphere has just one or two jets per hemisphere, whereas Jupiter and Earth's oceans have many (see the figure) Several new planetary flight
